SKILLS

- **Languages:** JavaScript, Python, C++, C
- **Frameworks:** ReactJs, NextJs, NodeJS, ExpressJs, Mongoose,
- **Tools/Platforms:** MongoDB, MySQL, Postman, Git,
- **Soft Skills:** Problem-Solving, Team Leader, Adaptability

INTERNSHIP

- **Kirijo: local Startup (IIT Guwahati) | Live** Aug'25-Jan'26
 - Developed modular frontend components using React.js, reducing initial load time by ~30% through implementation of lazy loading.
 - Integrated REST APIs handling 100+ concurrent requests, improving data fetch efficiency by 25%
 - Improved authentication, database operations, and backend workflows to enhance system reliability, scalability, and overall application performance.
 - Hosted at: www.kirijo.com

PROJECTS

- **AI-POWERED INVESTMENT RESEARCH PLATFORM: | Live** Jul'26 – Jul'26
 - Designed and build an AI-powered investment research platform that automates company analysis, reducing manual research effort and accelerating decision-making.
 - Architected a full-stack Next.js application with secure authentication, Firebase integration, and AI agent orchestration to generate comprehensive research reports from public data sources.
 - Integrated Large Language Models, web search, and cloud-based deployment to deliver structured insights, financial analysis, risk assessment, and investment recommendations through an interactive dashboard.
- **ServeQ: A Real-time Smart Queue Management Platform: | Live** Mar'26 – Jul'26
 - Designed a scalable real-time queue management platform, reducing waiting time and optimizing customer flow for service-based systems
 - Architected a full-stack MERN application with RESTful API design, authentication, and role-based access control; incorporated Socket.IO for real-time communication and live queue tracking
 - Enhanced queue management system by integrating MongoDB Atlas and AWS cloud services, improving real-time data processing and achieving a ~20% reduction in average wait times
- **Water Monitoring System – AI-Powered Web Application: | Live** Oct'24 – Nov'24
 - Implemented an AI-powered system to analyze water pollution using manual inputs and image-based detection.
 - Created a full-stack PHP portal with authentication, surveys, MySQL visualization, and blended an OpenCV–PyTorch model with an ML pipeline for preprocessing, feature extraction, and pollution prediction.
 - Optimised and delivered a deployed solution with a clean UI that provides real-time analysis, automated image detection, and comparative insights across locations.

CERTIFICATIONS

- MongoDB Associate Developer | MongoDB Apr'26
- Oracle Cloud Infrastructure Certified AI Foundations Associate | Oracle Apr'26
- Mobile Application Development using Flutter | CipherSchools Jun'25
- Privacy and Security in social media | NPTEL Jan'25
- Problem Solving Skills | Hacker Rank Nov'23

ACHIEVEMENTS

- Solved 400+ Data Structures and Algorithms problems (LeetCode, HackerRank)
- Accomplished 5-star rating in C++ in Hacker Rank
- Accomplished 4-star rating in Python in Hacker Rank

EDUCATION

- **Lovely Professional University** Punjab, India
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.62** Since Aug'2023
- **Burdwan Municipal High School** Burdwan, West Bengal
Higher Secondary; **Percentage: 85%** Apr'2021 – Mar'2022
- **Delhi Public School** Burdwan, West Bengal
Matriculation; **Percentage: 91%** Apr'2019– Mar'2020
